

SPECIAL WHITE EP LITHIUM GREASE (LG-380)

(Lithium Hydroxide + Special Extreme Pressure Additive)

DESCRIPTION: **SPECIAL WHITE EP LITHIUM** is white, translucent, penetrative grease with a slight creamy consistency, penetrates and forms a protective film that withstands, corrosion loads and speeds premium grease designed for constructions, automotive and industrial applications. White Lithium Grease provides long-lasting lubrication for metal-to-metal applications that require heavy-duty lubrication and leaves behind a rust-inhibiting barrier for protection against corrosion and will not splatter, melt, run, wash-off or freeze. This long-lasting formula won't melt, freeze, or run in harsh weather conditions. Also great for lubricating equipment before placing in storage. Sprays on easily with a thick, protective coating for outdoor and automotive hinges, gears, sprockets, latches, door tracks, pulleys, cables and guide rails. Safe to use on metals. Applications where extensive water contact or presence of sea water (salt water) & resistance to water washout and effective protection from wear and corrosion.

FEATURES & BENEFITS SPECIAL WHITE EP LITHIUM

- Protection against rust and corrosion, resistance to water washout for equipment protection.
- Extended bearing life, Increases Re-Lubrication Interval and also reduce energy consumption.
- Extends bearings life and gives longer relubrication intervals.
- Good pump ability in centralized systems & easy to spray, Effective leakage control.
- Highly resistance to water washes out – Better bearing protection and lower grease consumption.
- Low consumption & Immediate monetary savings.
- High protection against seizure and wear, avoiding expensive repairs.
- Thermally stable, can withstand high shock loads, and minimizing metal to metal contact.
- High drop point ensures extended operating temperature range upto -20°C to 160°C.
- Provides all weather lubrication for any moving part
- Eliminates squeaks and squeals and won't run or wash away

APPLICATIONS

- **SPECIAL WHITE EP LITHIUM** is recommended for multipurpose applications in antifriction ball & plain bearings in industrial, automotive and marine sectors for threaded components to protect coating for auto hinges, gears, flanges, cogs, sprockets, latches, door tracks, pulleys, cables and more.
- It protects metal-on-metal rust resistant lubricant. Get unbeatable, long lasting protection with this white lithium grease formula. It sprays on easily with a thick.

PROPERTIES OF SPECIAL WHITE EP LITHIUM GREASE

NLGI GRADE	00 - 000
Thickener Type	Special synthesized lithium hydroxide
Color, Visual	off- white (beige)
Penetration, Worked, 25°C	440
Viscosity Cst @ 40°C	320
Operating Range	-20°C to 160°C
4-Ball Weld Load	250
Dropping Point	+190
